

Interactive Digital Business Card

💡 Goal: You will create a modern, interactive digital business card using HTML & CSS, incorporating 3D flip effects, card borders, and hover interactions to develop real-world web design skills.

📄 Step-by-Step Instructions

◆ Step 1: Set Up the HTML Structure

1. Open a new HTML file and include the necessary elements.
2. Add a business card container that holds both the front and back sides of the card.
3. The front side will have:

A profile image

A name and title

4. The back side will have:

A short bio

Contact details (email & phone number)

◆ Step 2: Apply CSS Styles to the Business Card (25 min)

1. Create a new CSS file (styles.css) to style the card.
2. Set up the container and card layout to center the business card.
3. Add a flip effect when hovering over the card.
4. Apply an animated glowing border for a sleek effect.
